

5 Gauge Universal Test Kit as a Cejn Solution

Part Number: Universal 5 Gauge Test Kit

CEJN wants to introduce you to our new 5 GAUGE UNIVERSAL TEST KIT.

Now you can have all your gauges in one place. If you need to do diagnostic pressure testing you can have all that you need at your fingertips. With this kit you can measure from Vacuum -760mmHg (0 psi Abs) to 600 Kg/psi) but you can choose the four pressure gauges that meet your requirements from the attached parts list.

This kit comes with nipples for Test 20, Cat and Komatsu but if you need to connect into a hydraulic circuit then the kit comes with standard adaptors for BSP, With UNO and JIC available upon request. If these do not meet with your requirements then optional adaptors are available upon request.

The 3 m test hose makes testing in a confined area a much simpler task utilizing one Hose fitted with a straight Coupling and the other using a 90° Degree Coupling for tight spots.

The kit comes in a specialised lightweight impact resistant poly case for ease of use and protection of the equipment.

Below is material list with some gauge options which allows the customer to choose the relevant Test Gauges to suit multiple applications, without changing the kit price.
